AUTOCOMPLEX 2006 –
Has confirmed its position as the leading hub
for Filling Stations, Car Wash Units, Parking,
Garage and service for vehicles in Eastern Europe.

The leading trade fair AUTOCOMPLEX has confirmed its leading position as the hub in Eastern Europe. Over the three days of the fair organizers registered a total of 8,000 trade visitors. Altogether 173 companies from 15 countries showcased the entire spectrum of new products, services and systems for Filling Stations, Car Wash Units, Parking, Garage and Service for Vehicles occupying an exhibition surface of more than 3,500 sqm space.

Alongside the traditionally very popular fields of filling stations, Car Wash Units and Service for Vehicles, this time Parking was also in greater demand. AUTOCOMPLEX also once again justified its reputation as a sectoral event for decision-makers. Many exhibitors reported encountering a large qualified demand and a generally investment-friendly trade audience.

Following current demands for suitable systems for parking problems in large cities in Russia, Messe Düsseldorf GmbH and its Russian partner ACS-Expo dedicated an own forum to the subject: "Experiences and perspectives in the development of multi-story car parks in Russian large cities". Numerous Journalists and visitors showed special interest for the simultaneously translated contributions, which caused lively discussions.

Next AUTOCOMPLEX will take place from October 3 - 5, 2007 in Moscow.
